

Assessment Centre

Bright Network Assessment Centre

Day 1	
9am	Welcome
~ 9.30am	HTML/CSS Training
~1pm	Lunch (1 hour)
2pm	BNTA Consultants* Q&A
~2.30pm	Group activity
Day 2	
9am	Group projects, continued
~12.30pm - 1.30pm	Lunch (you can choose when to take lunch!)
1.55pm	Tech check
2pm-4pm	Presentations

Classroom Etiquette

- If possible, wear headphones. Even if your headphones do not have a mic, it will improve sound quality for everyone else
- Questions are welcome at any time, just raise your zoom hand 🙋 (please wait to be prompted)
- Keep your camera on
 - (if you have any issues, please message us, Zoom chat is fine)
- Today, we will need:
 - VS Code / Visual Studio
 - A web browser - Chrome best, anything else is fine!
- We take breaks! Approx 10 mins
 - 🚫 Stay on the call, camera off, on mute. Return at the appointed time.
 - Lunch: you can stay on the call
- Check the Zoom chat for links

Projects

- Groups of 4-5 people
- Spend a little time introducing yourselves
- Agree to take at least one break   
- Agree a finish time (I'll close the call around 5.10pm - don't worry you'll get a warning!)
- Agree who is going to create the project 
- Check everyone can screen share - you may need to change some settings and rejoin the call
- Feel free to organise your work as you see fit
 - mob the whole thing! Everyone contributes to everything
 - Divide your site into sections and parcel out the work
- Communicate, communicate, communicate
- Respect, respect, respect
- You are judged as a team 
- Consider using Trello or a shared google doc to help manage work/gather ideas
- Consider using something like Excalidraw to sketch ideas out
- You are allowed to ask for help but first try: asking each other, Googling it
- Don't panic, invest a little time in planning
- Enjoy it!

Presentations

- 10mins total
- 7 mins presenting, 3 mins for any questions
- Every person in the group should speak
- If your camera is off, please explain why
- At the start of the presentation, raise your Zoom hands and keep them raised for the presentation (this brings you to the top of the screen)
- Your presentation should include a demo of the project
- Each team member can choose to talk through any part of the group project

Some examples

- If you chose to work on separate parts, each team member can talk through the specific part of the website they are responsible for.
 - May not require slides
 - “I worked on the header and nav bar. My challenges were to use flex-box (something we hadn’t been taught) to style the header and create a hover effect for the links. I also had to ensure our links connected to the other pages of our website...etc”
- If you all worked on your project together as a ‘mob’, each team member could talk about some specific aspect of the project. This could be:
 - How the team collaborated, what tools you used, what was helpful, what was not
 - Any challenging parts of the code, did you struggle to figure something out? Perhaps you’ve tried to implement a ‘dark mode’ but it can only switch from light to dark and not vice versa
 - The design process, what tools did you use? Perhaps you chose to use a dyslexia friendly font? Why did the group choose this particular shop?
 - Often requires slides
- In all cases, typically one person does the screen sharing
